

FS Fully Formulated 50/50 Pre-Diluted Coolant/Antifreeze (Pink)

Description

FS Fully Formulated 50/50 Pre-Diluted Coolant/Antifreeze is a 50/50 mix of Fully Formulated Coolant and deionized water and is designed to provide engine protection for heavy-duty cooling systems.

For years, heavy-duty operators were limited to using low-silicate automotive antifreeze that required the addition of a separate supplemental coolant additive (SCA) at initial fill and top off. While this was effective, it resulted in mixing errors when the SCA was added. To prevent SCA variability caused by mixing errors and improve convenience, FS Fully Formulated 50/50 Pre-Diluted Coolant/Antifreeze was developed.

FS Fully Formulated 50/50 Pre-Diluted Coolant/Antifreeze is a universal formula antifreeze, having the advantages of low total dissolved solids, low silicate, and incorporated nitrite to provide enhanced wet sleeve liner cavitation protection. Since FS Fully Formulated 50/50 Pre-Diluted Coolant/Antifreeze has a high quality of SCA, there is no need to add SCAs at initial fill or when topping off to compensate for SCA dilution.

Features and Benefits:

- No additional SCAs required at initial fill or top-off
- Pre-diluted with deionized water; no need to add water at initial fill or when topping off
- Low silicate, low total dissolved solids
- Phosphate-free formula that reduces the risk of scale
- Contains nitrite for superior wet sleeve liner cavitation protection
- State-of-the-art corrosion inhibitors
- Use at top-off to maintain correct SCA levels
