

FS Rust-Off

Liquid Rust Remover

FS Rust-Off will quickly remove rust while not harming steel, copper, iron, brass, or aluminum. **FS Rust-Off** removes corrosion from metal without creating a waste disposal problem. Steel covered with rust will look like new after soaking the piece.

Usage Directions:

Remove heavy deposits, oil, and dirt by immersing the steel in any container (parts washer, plastic drum, etc.). **FS Rust-Off** takes as little as 15 minutes for parts with flash rusted parts, and several hours for pieces with severe rust issues. Once the rust is removed, let the steel dry. When the rust removing properties of FS Rust-Off have been used, the fluid will turn black. The product should then be changed, and fresh new product should be added to the system.

FS Rust-Off Benefits:

- Quickly removes corrosion from ferrous and non-ferrous metals (tubes, tools, etc.)
- Removes rust fast and is much less expensive than pickling
- Organic and biodegradable, contains no acids or VOC's
- Easy to use. (Dip it and ship it).
- Environmentally safe and easy to dispose of (must be disposed according to local, state, federal, and international guidelines)
- Will not tarnish or pit un-rusted steel
- Non-flammable
- Mild odor makes for high operator acceptance of the product, and makes it practical for indoor use
- Product may be heated to 110 degrees F to decrease rust removal times (tank should be covered in between cleaning cycles)

Physical Properties:

Appearance:	Clear/ Water White
Odor:	Slight/ Soap Smell
pH:	5.5
